Summary

QA with 1.5 years of experience in test automation for public-sector management software. Built a module's E2E test architecture from scratch, automated 115 web scenarios with Cypress and mobile flows with Appium + Python, and integrated the suites into CI/CD. Also perform API, performance and security testing, lead another tester and cover for the module's business analyst. Pursuing a Bachelor's in Information Systems at the Federal University of Santa Maria (UFSM).

Experience

Software Tester (QA) — Digifred Sistemas para Gestão Pública

Frederico Westphalen, Brazil · Mar 2025 – Present

- Built the Education module's E2E automation architecture from scratch (Cypress, BDD/Gherkin, Page Object Model and an Elements layer), with 71 automated scenarios.
- Revived the Health module's stalled E2E suite: upgraded Cypress to v13.5, replaced hard-coded waits with assertions and XPath with CSS selectors, reduced duplicated code and expanded coverage to 44 scenarios.
- Automated login and sync flows for the Digi Professores mobile app with Appium, Python, Behave and Allure Reports.
- Integrated the suites into CI/CD on Bitbucket Pipelines, with Docker caching and memory tuning to optimize execution.
- Validated data recovery after a production incident by running the E2E suites across three environments (isolated, staging and production), avoiding a full night of manual validation.
- Reported 114 valid bugs and logged 450+ tickets in Jira. Perform API and performance testing (Postman, JMeter, Chrome DevTools) and security testing (Burp Suite).
- Lead and trained another tester, cover for the module's business analyst, pair with developers on business rules and review code before testing.

- Expanding QA to all company modules; built the base automation architecture for the Tax, Accounting and Payroll modules, which are migrating from Delphi to Java 21.

Google Cloud Facilitator — Google Cloud program

2025 – 2026

- Presented Google Cloud courses, coordinated participants and represented the program at a career fair.

Network Infrastructure Technician — LS Soluções em Tecnologia

Nov 2024 – Mar 2025

- Installed and configured structured cabling, CCTV and security systems in 3 branches of the Sicredi credit union.

Internship Coordinator — Casa Familiar Rural de Riqueza, Brazil

2024 (6 months)

- Managed internships for 60 technical-school students: professional conduct classes, contracts and report-based evaluations.

Java Developer Intern — Noagro Sistemas

2023

- Built Java desktop screens connected to a database and adjusted the barcode reading routine to display prices on a self-service kiosk.

Projects

- **Web and mobile E2E automation** (GitHub): practice suites with Cypress (Swag Labs) and Appium + Python with BDD (Sauce Labs Demo App).
- **Anibem 24h Veterinary Hospital website redesign** (anibemhospitalvet24h.com.br), freelance: replaced a broken site with a new one in semantic HTML5, Tailwind CSS and JavaScript, with SEO, WebP images and per-service WhatsApp shortcuts.

Education

- **B.S. in Information Systems** — Federal University of Santa Maria (UFSM), Frederico Westphalen · In progress, expected 2028

- **Agricultural Technician** (technical high school) — Casa Familiar Rural de Riqueza · 2023
- **Courses:** QA Journey (EBAC) · Java (Curso em Vídeo)

Certifications

- Google Cloud Computing Foundations Certificate + 4 skill badges (secure networking, load balancing, app dev environment, data for ML) — Google Cloud, 2025
- Google Project Management Professional Certificate — Google/Coursera, 2025
- Google AI Essentials — Google/Coursera, 2025

Technical Skills

- **Automation:** Cypress, Appium, BDD/Gherkin (Behave, Cucumber), Page Object Model, Allure Reports
- **Languages:** JavaScript, Python, Java
- **API, performance and security:** Postman, JMeter, Chrome DevTools, Burp Suite
- **CI/CD and tools:** Bitbucket Pipelines, Docker, Git, Jira, Confluence
- **Other:** AI-assisted development (Gemini, Claude), Google Cloud fundamentals, HTML5 and Tailwind CSS

Languages

- **Portuguese:** native
- **English:** basic — technical documentation reading
